# 11 Repairs and After-Sales Service

## ■ Be sure to read the warranty.

Only when the product is damaged by using it in a normal way within the warranty period, we will repair the product for free based on our regulation. The repair will be paid for when the damage is due to use in improper ways (i.e., damages due to failure in operation, misuse etc.) or beyond the warranty period, or without the warranty attached (Copies will not be accepted). Note that some damages may not be repairable.

The scope of the warranty is limited to the Proportional Radio System, excluding aircrafts and engines other than that of the product.

Please note beforehand that we will not be responsible for any damage to the data which was set or recorded by the customer/the third person, data loss, damage caused by missing an opportunity of the product use, and compensation for damage to human life, health or property as well as damage incidental to the above.

When the warranty period is expired, we will repair the product for cost if requested by the customer and if we judge that the product may be continuously used after repairing.

■ Please note in advance that warranty period may vary depending on each JR Sales Agent (JR Distributor) in your country. Please contact them for further details concerning the warranty or After-Sales Service (i.e. Repair services, purchase of parts and/or the accessories).

## ■ Preset Data

Save the preset data on a data sheet or in SD card. before requesting for repair.

The product may be initialized during the repair as needed. We will not be responsible for any damage or loss of data set by customers.

## ■ Caution ■

1. This product and the document are copyrighted by Japan Remote Control Co., Ltd.  
It is prohibited by the applicable law to duplicate, copy, reprint, or modify the product/document without prior notice either entirely or partially.
2. This product is not designed to be used as an equipment or instrument which involves human life including purpose: for medical instrument, aerospace instrument, transport equipment, and weapon system, or any other purpose in which high reliability is required, such as space satellite use. We will not be responsible for physical injury, fire, or any other social damage arising from using the damaged product to either of these equipments or equipment control systems.
3. The product and the contents in the document are subject to change without prior notice due to modification
4. If customers violates any of the terms listed in ■ Caution ■ of the document, customers shall terminate the use of the product if ordered by our company.
5. Please note that regardless of the above, we will not be responsible for any other effects which arise by operating the product.

## Warranty Terms of the Proportional System

Please note that a warranty without a distributor's stamp or purchase date is invalid.

**Make sure to enclose the warranty and send the product to the JR Service Section when requesting for after-sales service of the JR Proportional System.**

**In addition, please note the following.**

1. The warranty period is 6 months after the date of purchase.
2. Repairs due to the following shall be paid for even if it is within the warranty period.  
Also, some products may not be repaired, depending on the degree of damage.
  - ⊙ Failure or damage caused by misuse of the product.
  - ⊙ Failure or damage caused by remodeling or unauthorized repair.
  - ⊙ Failure or damage caused by natural disaster including fire, earthquake, flood disaster, etc., abnormal voltage, or any other external factors.
  - ⊙ Failure or damage caused during transportation.
  - ⊙ When the warranty is lost or not submitted (Copy will not be accepted).
  - ⊙ When required information including the name of the distributor and purchase date is not filled in, or when the information is amended.
  - ⊙ Damage due to fuel, water, oil, or sea water.
3. This warranty is valid only in Japan.
