

NE14T? (anyone for tea?)

Bostonian by Russ Lister 2005 - sheet 1 of 3

For 14g rules and indoor/outdoor use.

Use prop. assembly of choice.

Original used:

Peck 6" prop.

Std. Peck prop shaft.

Std. Peck thrust button.

Std. Peck brass thrust washers.

Orange line denotes the 'imaginary' Bostonian box
(join plan at the rear line of this box)

Wing glued in place after
covering on original

4° downthrust

Fuselage construction is mainly 1/16" square (or 1/20")

The original performed well with a 450mm loop (900mm length)
of 1/8" Supersport rubber - experiment with different motors for
optimum performance.
